To answer the following questions, please go on-line to Google Earth. Once there, select "Tools", then select "Options". Next select the "3D View" tab, then select "Decimal Degrees", then hit "Apply". Enter in your home address then select "Search". Locate your well site on the map and hover your mouse over your well. The data you need is located at the bottom of the page.
Latitude Longitude Elevation

D. PERMISSION

I understand that if my well is selected as a monitoring well for the study, that modifications to my well will be necessary. This includes the installation of specialized monitoring equipment and an access pipe within my well.
I further understand that data collected from my well will require an official agent from a groundwater district to enter my property. If I so choose, I can request that a phone call be made prior to their entering of my property. I may be required to provide gate codes etc. or general access if I am not home. I, and the general public, shall be able to access the data collected within the study.
If I do not wish to be part of the study any longer, I shall provide notice to the appropriate groundwater district including allowing access to my well site for the removal of the monitoring equipment.

[] I understand and agree that my typed name is considered my official signature.

Signature of Well Owner or Authorized Agent
